Evolutionary Ecology, 1989, **3**, 371–374

Index to Volume 3 of Evolutionary Ecology

SUBJECT INDEX

Adaption, coevolution, foraging theory, predation, 157
Adaptive evolution, Cambrian, Permian, rugged fitness landscapes, 274
Age of maturity, pandalid shrimp, 236
Antagonistic pleiotropy, cost allocation trade-offs, *Drosophila melanogaster*, fecundity, life history, longevity, 51
Aphelocoma coerulescens coerulescens, Florida Scrub Jay, communal breeding, non-breeders, 77
Aphids, *Aphis nerii*, life history, wing diamorphism, genetic variation, geographic variation, host plant permanence, 327
Aphids, *Aphis nerii*, wing diamorphism, life history, body size, 313
Aphis nerii, life history, wing diamorphism, genetic variation, geographic variation, host plant permanence, aphids, 327
Aphis nerii, wing diamorphism, life history, body size, aphids, 313
Arms race, coevolution, *Eurostata, Eyrytoma*, gallmakers, parasitoids, phenotypic plasticity, 361

Body size, aphids, *Aphis nerii*, wing diamorphism, life history, 313
Breeding site variation, cactus, Sonoran desert, developmental homeostasis, life history traits, *Drosophila*, 189

Cactus, Sonoran desert, developmental homeostasis, life history traits, *Drosophila*, breeding site variation, 189
Cambrian, Permian, rugged fitness landscapes, adaptive evolution, 274
Coevolution, *Eurostata*, *Eyrytoma*, gallmakers, parasitoids, phenotypic plasticity, arms race, 361
Coevolution, foraging theory, predation, adaptation, 157
Colony founding, competition, dynamic programming, Formicidae, Hymenoptera, kin discrimination, pleometrosis, Polistinae, social insects, 221
Communal breeding, non-breeders, Florida Scrub Jay, *Aphelocoma coerulescens coerulescens*, 77
Communication, female preferences, repeatability, sexual selection, mating behaviour, evolution, 173
Competition, deserts, *Oryzopsis*, population models, interaction assessment, INTASS, density dependence, species interaction, 115
Competition, dynamic programming, Formicidae, Hymenoptera, kin discrimination, pleometrosis, Polistinae, social insects, colony founding, 221
Competitive coevolution, fitness maximization, 215
Consumer-resource systems, functional responses, 95
Cost allocation trade-offs, *Drosophila melanogaster*, fecundity, life history, longevity, antagonistic pleiotropy, 51

Density-dependence, fitness, habitat selection, ideal free distribution, life history, Ontario, rodent, 80
Density-dependence, species interaction, competition, deserts, *Oryzopsis*, population models, interaction assessment, INTASS, 115
Deserts, *Oryzopsis*, population models, interaction assessment, INTASS, density-dependence, species interaction, competition, 115
Developmental homeostasis, life history traits, *Drosophila*, breeding site variation, cactus, Sonoran desert, 189
Digestion, optimality, herbivory, foraging theory, diet selection, 264
Dispersal behavior, flight muscle histolysis, waterstrider, evolutionarily stable strategy, risk-spreading, 283

© 1989 Chapman and Hall Ltd

Drosophila, breeding site variation, cactus, Sonoran desert, developmental homeostasis, life history traits, 189
Drosophila, genetic elements, isozymes, life span, 31
Drosophila melanogaster, fecundity, life history, longevity, antagonistic pleiotropy, cost allocation trade-offs, 51
Dynamic programming, Formicidae, Hymenoptera, kin discrimination, pleometrosis, Polistinae, social insects, colony founding, competition, 221

ESS, sex ration, parasitoids, local mate competition, host quality, 203
Eurosta, *Eurytoma*, gallmakers, parasitoids, phenotypic plasticity, arms race, coevolution, 361
Eurytoma, gallmakers, parasitoids, phenotypic plasticity, arms race, coevolution, *Eurosta*, 361
Evolution, communication, female preferences, repeatability, sexual selection, mating behavior, 173
Evolution, exploitation, fisheries, *Gadus morhua*, life history, optimization, 343
Evolution, herbivores, predation, selection, host range, 299
Evolutionary stable strategy, risk-spreading, dispersal behavior, flight muscle histolysis, waterstrider, 283
Exploitation, fisheries, *Gadus morhua*, life history, optimization, evolution, 343

Fecundity, life history, longevity, antagonistic pleiotropy, cost allocation trade-offs, *Drosophila melanogaster*, 51
Feeding behavior, herbivore, plant defense, species richness, guild, 64
Feeding physiology, life strategy, habitat, 1
Female preferences, repeatability, sexual selection, mating behavior, evolution, communication, 173
Fisheries, *Gadus morhua*, life history, optimization, evolution, exploitation, 343
Fitness, habitat selection, ideal free distribution, life history, Ontario, rodent density-dependence, 80
Fitness maximization, competitive coevolution, 215
Flight muscle histolysis, waterstrider, evolutionary stable strategy, risk-spreading, dispersal behavior, 283
Florida Scrub Jay, communal breeding, non-breeders, *Aphelocoma coerulescens coerulescens*, 77
Foraging, oviposition, *Rhagoletis basiola*, reproduction costs, 183
Foraging theory, diet selection, digestion, optimality, herbivory, 264
Foraging theory, predation, adaption, coevolution, 157
Formicidae, Hymenoptera, kin discrimination, pleometrosis, Polistinae, social insects, colony founding, competition, dynamic programming, 221
Fruit color, polymorphism, *Rhagodia parabolica*, seed dispersal by birds, seed germination, 40
Functional responses, consumer-resource systems, 95

Gadus morhua, life history, optimization, evolution, exploitation, fisheries, 343
Gallmakers, parasitoids, phenotypic plasticity, arms race, coevolution, *Eurosta, Eurytoma*, 361
Genetic correlations, heritability, lizards, locomotion, performance, quantitative genetics, *Sceloporus occidentalis*, speed, stamina, 240
Genetic elements, isozymes, life span, *Drosophila*, 31
Genetic variation, geographic variation, host plant permanence, aphids, *Aphis nerii*, life history, wing diamorphism, 327
Geographic variation, host plant permanence, aphids, *Aphis nerii*, life history, wing diamorphism, genetic variation, 327
Guild, feeding behavior, herbivore, plant defense, species richness, 64

Habitat, feeding physiology, life strategy, 1
Habitat selection, ideal free distribution, life history, Ontario, rodent, density-dependence, fitness, 80
Herbivore, plant defense, species richness, guild, feeding behavior, 64
Herbivores, predation, selection, host range, evolution, 299
Herbivory, foraging theory, diet selection, digestion, 264
Heritability, lizards, locomotion, performance, quantitative genetics, *Sceloporus occidentalis*, speed, stamina, genetic correlations, 240
Host plant permanence, aphids, *Aphis nerii*, life history, wing diamorphism, genetic variation, geographic variation, 327
Host quality, ESS, sex ratio, parasitoids, local mate competition, 203
Host range, evolution, herbivores, predation, selection, 299
Hymenoptera, kin discrimination, pleometrosis, Polistinae, social insects, colony founding, competition, dynamic programming, Formicidae, 221

INTASS, density-dependence, species interaction, competition, deserts, *Oryzopsis*, population models, interaction assessment, 115
Ideal free distribution, life history, Ontario, rodent, density-dependence, fitness, habitat selection, 80
Interaction assessment, INTASS, density-dependence, species interaction, competition, deserts, *Oryzopsis*, population models, 115
Isozymes, life span, *Drosophila*, genetic elements, 31

Kin discrimination, pleometrosis, Polistinae, social insects, colony founding, competition, dynamic programming, Formicidae, Hymenoptera, 221

Life history, body size, aphids, *Aphis nerii*, wing diamorphism, 313
Life history, longevity, antagonistic pleiotropy, cost allocation trade-offs, *Drosophila melanogaster*, fecundity, 51
Life history, Ontario, rodent, density-dependence, fitness, habitat selection, ideal free distribution, 80
Life history, optimization, evolution, exploitation, fisheries, *Gadus morhua*, 343
Life history, wing diamorphism, genetic variation, geographic variation, host plant permanence, aphids, *Aphis nerii*, 327
Life history traits, *Drosophila*, breeding site variation, cactus, Sonoran desert, developmental homeostasis, 189
Life span, *Drosophila*, genetic elements, isozymes, 31
Life strategy, habitat, feeding physiology, 1
Lizards, locomotion, performance, quantitative genetics, *Sceloporus occidentalis*, speed, stamina, genetic correlations, heritability, 240
Local mate competition, host quality, ESS, sex ratio, parasitoids, 203
Locomotion, performance, quantitative genetics, *Sceloporus occidentalis*, speed, stamina, genetic correlations, heritability, lizards, 240
Longevity, antagonistic pleiotropy, cost allocation trade-offs, *Drosophila melanogaster*, fecundity, life history, 51

Mating behavior, evolution, communication, female preferences, repeatability, sexual selection, 173

Non-breeders, Aphelocoma coerulescens coerulescens, Florida Scrub Jay, communal breeding, 77
Nuculaspis californica, scale insect demes, sex ratio, ploidy, 253
Offspring size variation, optimal investment in offspring, optimal offspring size, 150
Ontario, rodent, density-dependence, fitness, habitat selection, ideal free distribution, life history, 80
Optimal offspring size, offspring size variation, optimal investment in offspring, 150
Optimality, herbivory, foraging theory, diet selection, digestion, 264
Optimization, evolution, exploitation, fisheries, *Gadus morhua*, life history, 343
Oryzopsis, population models, interaction assessment, INTASS, density-dependence, species interaction, competition, deserts, 115
Oviposition, *Rhagoletis basiola*, reproduction costs, foraging, 183

Pandalid shrimp, age of maturity, 236
Parasitoids, local mate competition, host quality, ESS, sex ratio, 203
Parasitoids, phenotypic plasticity, arms race, coevolution, *Eurosta, Eurytoma*, gallmakers, 361
Performance, quantitative genetics, *Sceloporus occidentalis*, speed, stamina, genetic correlations, heritability, lizards, locomotion, 240
Permian, rugged fitness landscapes, adaptive evolution, Cambrian, 274
Phenotypic variation, plasticity, arms race, coevolution, *Eurosta, Eurytoma*, gallmakers, parasitoids, 361
Plant defense, species richness, guild, feeding behavior, herbivore, 64
Pleometrosis, Polistinae, social insects, colony founding, competition, dynamic programming, Formicidae, Hymenoptera, kin discrimination, 221
Ploidy, *Nuculospis californica*, scale insect demes, sex ratio, 253
Polistinae, social insects, colony founding, competition, dynamic programming, Formicidae, Hymenoptera, kin discrimination, Pleometrosis, 221
Polymorphism, *Rhagodia parabolica*, seed dispersal by birds, seed germination, fruit color, 40
Population models, interaction assessment, INTASS, density dependence, species interaction, competition, deserts, *Oryzopsis*, 115
Predation, adaption, coevolution, foraging theory, 157

Predation, selection, host range, evolution, herbivores, 299

Quantitative genetics, *Sceloporus occidentalis*, speed, stamina, genetic correlations, heritability, lizards, locomotion, performance, 240

Repeatability, sexual selection, mating behavior, evolution, communication, female preferences, 173
Reproduction costs, foraging, oviposition, *Rhagoletis basiola*, 183
Rhagodia parabolica, seed dispersal by birds, seed germination, fruit color, polymorphism, 40
Rhagoletis basiola, reproduction costs, foraging, oviposition, 183
Risk-spreading, dispersal behavior, flight muscle histolysis, waterstrider, evolutionarily stable strategy, 283
Rodent, density-dependence, fitness, habitat selection, ideal free distribution, life history, Ontario, 80
Rugged fitness landscapes, adaptive evolution, Cambrian, Permian, 274

Scale insect demes, sex ratio, ploidy, *Nuculaspis californica*, 253
Sceloporus occidentalis, speed, stamina, genetic correlations, heritability, lizards, locomotion, performance, quantitative genetics, 240
Seed dispersal by birds, seed germination, fruit color, polymorphism, *Rhagodia parabolica*, 40
Seed germination, fruit color, polymorphism, *Rhagodia parabolica*, seed dispersal by birds, 40
Selection, host range, evolution, herbivores, predation, 299
Sex ratio, parasitoids, local mate competition, host quality, ESS, 203
Sex ratio, ploidy, *Nuculaspis californica*; scale insect demes, 253
Sexual selection, mating behavior, evolution, communication, female preferences, repeatability, 173
Social insects, colony founding, competition, dynamic programming, Formicidae, Hymenoptera, kin discrimination, pleometrosis, Polistinae, 221
Sonoran desert, developmental homeostasis, life history traits, *Drosophila*, breeding site variation, cactus, 189
Species interaction, competition, deserts, *Oryzopsis*, population models, interaction assessment, INTASS, density-dependence, 115
Species richness, guild, feeding behavior, herbivore, plant defense, 64
Speed, stamina, genetic correlations, heritability, lizards, locomotion, performance, quantitative genetics, *Sceloporus occidentalis*, 240
Stamina, genetic correlations, heritability, lizards, locomotion, performance, quantitative genetics, *Sceloporus occidentalis*, speed, 240

Waterstrider, evolutionary stable strategy, risk-spreading, dispersal behavior, flight muscle histolysis, 283
Wing diamorphism, genetic variation, geographic variation, host plant permanence, aphids, *Aphis nerii*, life history, 327
Wing diamorphism, life history, body size, aphids, *Aphis nerii*, 313
